Senior Programmer / Developer Cover Letter

835 Christiansen PikeLake Nanci, IL 37651

Dear Dylan Balistreri,

In response to your job posting for senior programmer / developer, I am including this letter and my resume for your review.

Previously, I was responsible for media relations services to researchers, including communication planning, interview preparation, message development and press conference planning.

Please consider my experience and qualifications for this position:

- Strong skill set on current intrusion methods and prevention
- Experience in security policies and practices, including ISO - 27000 or 27034
- Should have hands on web application development
- Willingness to travel often and work with a global team
- Managing capacity and performance to help scale the infrastructure both on public and private clouds around the world
- Working with Chef and Ansible for automation
- A strong data-driven/fact-based decision maker
- Analysis of tasks, estimation and quality of deliverables

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Lennon Batz
