

# Senior Software Developer Cover Letter

5889 Cummings Walk South Sharronfurt, WV 57744-0098

**Dear Oakley Yundt,**

I would like to submit my application for the senior software developer opening. Please accept this letter and the attached resume.

Previously, I was responsible for and update appropriate documentation that facilitates others to further develop or maintain the software and systems that you produce, and enables your internal customers to do their work (SQA, Help and Localisation specialists, Applications Scientists, Product Managers and Customer Support staff).

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience creating accessible applications
- Interest in higher education applications
- Experience with Java Performance Analysis and Tuning
- Experience with designing and implementing SaaS based applications
- Experience with Service Oriented Architecture (SOA) standards
- AJAX and RESTful API's
- Experience in ANT, Maven, Jenkins, SVN and Git
- SQL tuning and API tuning

**Thank you for your time and consideration.**

Sincerely,

Emerson Kassulke
