

Senior Software Engineer, UI Cover Letter

282 Adams Oval West Jaemouth, IL 31688-7912

Dear Denver Tromp,

I am excited to be applying for the position of senior software engineer, UI. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for critical analysis of programming and development practices with the goal of improving quality and team efficiency and fostering a positive working environment.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience developing rich UI web-based user interfaces, including experience writing object-oriented JavaScript
- Expertise in hand-coded Semantic HTML, CSS, and JavaScript
- Familiarity with cross-browser differences
- Solid development skills with knowledge of JQuery, AJAX, Spring MVC, or other web and UI based frameworks
- Exposure to development using Java, Go, Python
- Background in new (and old) software technologies like distributed caching, WebLogic Server, Tomcat, messaging platforms (MQ and webMethods), MS SQL, and continuous integration technologies like Maven, Hudson, and Sonar
- Knowledge of design with Photoshop, iRise, and other UI development tools
- Broad knowledge of data exchange formats, including XML and JSON

I really appreciate you taking the time to review my application for the position of senior software engineer, UI.

Sincerely,

Rory Johnston
