Senior Software Engineer, UI Cover Letter

138 Mitchell HeightsPort Catherine, TN 59219-7657

Dear Zion Parisian,

In response to your job posting for senior software engineer, UI, I am including this letter and my resume for your review.

In my previous role, I was responsible for solution design input across the product, comfortable working alongside colleagues proposing ideas and providing collaborative forms of technical leadership to the team.

Please consider my experience and qualifications for this position:

- Having superb attention to detail
- Experience of working with UX developers, product managers and technical leaders
- Experience of architecting and building Cloud based applications
- Experience of build and integration technologies (for example Ant, Maven, Jenkins)
- Knowledge of responsive web design patterns
- Experience of delivering rich Single Page Applications (SPAs)
- Participate in the design and implementation of Tridium's next generation Niagara software technology
- Write well designed, testable, high quality, efficient code

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Stevie Lueilwitz
