

# Senior Software Engineer, UI Cover Letter

17946 Abshire RiverLake Johnnie, FL 81861-3858

**Dear Alexis Mayert,**

I submit this application to express my sincere interest in the senior software engineer, UI position.

In my previous role, I was responsible for activities related to the management of assigned projects to bring the project to a timely close and transition the client appropriately.

Please consider my qualifications and experience:

- Experience with test frameworks like Jasmine test runners like Karma, Protractor
- Expert in C#/.Net, WPF
- Experience on C/C++, ASP .Net, Powershell, WCF
- Strong JavaScript, HTML5 & CSS3 knowledge
- Web service development (RESTful APIs)
- Experience of using JSON, XML, AJAX
- Use of AngularJS (Or knowledge of other modern JavaScript frameworks)
- Knowledge and application of Unit testing, Test Driven Development and Automation

**Thank you for considering me to become a member of your team.**

Sincerely,

Dylan McKenzie
