Dear Briar Kunde,

I submit this application to express my sincere interest in the senior web developer position.

Previously, I was responsible for ongoing operational support to Web Platform which includes Drupal, PHP, Veeva Vault and MySQL.

My experience is an excellent fit for the list of requirements in this job:

- Based applications development, XML, HTML, Java, JavaScript, REST, Docker, and the latest Cloud and DevOps technologies
- Great opportunity and Great perks
- Strong CSS / HTML / JavaScript expertise
- Proven track record of interacting and troubleshooting issues with API data driven applications
- Bachelors in computer science, math, or other engineering majors
- Strong understanding of C#, VB.NET, SQL, ASP.NET
- Should enjoy agile practices such as pair programming, TDD, story planning
- JavaScript frameworks such as Angular, Knockout, Ember or React

Thank you for your time and consideration.

Sincerely,

Jordan Crona
