

SharePoint Engineer Cover Letter

799 Cartwright Meadow New Asa, VT 56944

Dear Greer Schultz,

I am excited to be applying for the position of sharepoint engineer. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for formal and informal training of content managers and end users on the best practices and standards of SharePoint site design.

My experience is an excellent fit for the list of requirements in this job:

- Being open-minded and communicative
- Carry out programming tasks for Web Publishing, Collaboration and Workflow Solutions including Request for Change (RfC) like bug fixing and enhancements or projects
- Provide technical consultation (e.g application design/development, effort estimation) based on business user requirements and best fit for system operations
- Perform tool study and provide technical recommendation on compatibility and the necessary technical adaptation in order to decide proof of concept and thereafter implementation
- Work closely with Application Owner and project team to ensure solution is delivered within scope, budget and timeline including participating in the application deployment and release process like packaging codes and deployment steps
- Experience with network load-balancing
- Familiarities working with Microsoft Active Directory enterprises environments
- Experience with Microsoft ADFS

I really appreciate you taking the time to review my application for the position of sharepoint engineer.

Casey Krajcik
