

SharePoint Engineer Cover Letter

77795 Harvey Rue East Charolettebury, VA 32381-4528

Dear Casey Bechtelar,

I submit this application to express my sincere interest in the sharepoint engineer position.

Previously, I was responsible for 24x7 support for SharePoint 2010 * Prepare upgrade Plan to migrate/upgrade existing SharePoint from 2010 to 2016 * Upgrade the SharePoint to 2016 including the migration of user data * Train users on using the new SharePoint 2016 * Generate weekly report on usage, issues and performance of SharePoint system.

My experience is an excellent fit for the list of requirements in this job:

- Experience with VMWare/ESX
- Experience assisting customer support (L1 and L2) requests and incidents within SharePoint
- High Level understanding of networking, including VLANs, TCP/IP, DNS, routing and switching
- Experience designing and implementing a highly available and resilient SharePoint infrastructure for disaster recovery and continuity of operations scenarios
- Knowledge and comprehension of the SharePoint security framework
- Proficiency with Microsoft Office development tools and practices
- Proficiency with n-tier MVC/WPF/C#/ASP.net development
- Familiarity with client development frameworks (angular.js, node.js)

Thank you for your time and consideration.

Sincerely,

Indigo Morar
