Dear Blake Batz,

I am excited to be applying for the position of SOA developer. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for I2 - L4 support in a Dev/Ops model for the tooling and function.

Please consider my experience and qualifications for this position:

- Experience in SOA/OSB monitoring/Job scheduling tools
- Strong knowledge in using all the adapters (Oracle Apps, JMS, File, FTP, DB, AQ, Webservice) and Oracle SOA components
- Good understanding of best practices around WSDL versioning, namespaces, and XML dictionaries
- Working knowledge of SOA architecture and security policies
- Excellent knowledge of Java, Web Services, ETL and related technologies & protocols (SOA, XML, MVC, LINQ,), Web Development Languages, Scripting Languages
- Experience with Enterprise Application Integration (EAI, SOA, ESB, and API) and n-tier client-server architectures
- Experience with IBM Integration Bus or WebSphere Message Broker (WMB) including hands on experience developing message flows to interface with services producers and consumers, and callout components
- Experience with complex XML Schema Document (XSD) design practices including hands on experience creating complex types and messages structures

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,
