

SOA Developer Cover Letter

618 Emmerich CenterTrenttown, IN 29202-4414

Dear Haven Larkin,

I submit this application to express my sincere interest in the SOA developer position.

In the previous role, I was responsible for continual assessment and review of unit testing and integration plans to ensure the solutions meet the business need and are working as designed.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with XPath, XQuery, XSLT and ESQL
- Experience with Java/J2EE Programing
- Knowledgeable in architecture governance practices
- Knowledgeable in the design and construction of integrated transactional & collaborative enterprise-level systems that are scalable and portable
- Understanding of Integration Architecture including identifying & decomposing solution architectures and business capabilities
- Understanding of Business process modeling & optimization techniques including orchestration of modeled process through a Workflow application
- Understanding of Object-Oriented techniques
- Experience across the full software development lifecycle with a real focus on design

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Casey Cassin
