Software Analyst Cover Letter

77838 Turcotte ForgeSchaeferview, IL 53577

Dear Royal Lakin,

In response to your job posting for software analyst, I am including this letter and my resume for your review.

In my previous role, I was responsible for post Deployment Software Support (PDSS) and Post Production Software Support (PPSS) pursuant to Army regulations.

Please consider my experience and qualifications for this position:

- Experience in MySQL/Postgres and be able to write complex queries, work with stored procedures, views, triggers
- Experience with creating web based visualizations
- Experience in object-oriented PHP 5.x development
- Experience with Zend Framework, XML, Ajax Frameworks or other similar frameworks
- Experience in architect systems, identify improvements, mentor the wider team, and cultivate a culture of high energy and technical excellence
- Demonstrated working knowledge of web service protocols - JSON-WSP, REST, SOAP, WSDL among others
- Experience in creating auto generated API documentation along with design documents for the assigned segments
- Experience in implementing theoretical concepts into real products and solutions is essential

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Bellamy Cassin
