

Software Analyst Cover Letter

5910 Grover ForkSouth Jeroldstad, MN 28335

Dear Shiloh Kunze,

In response to your job posting for software analyst, I am including this letter and my resume for your review.

In my previous role, I was responsible for traceability, accountability and distribution for Army software products as required by Headquarters Department of the Army (HQDA), Chief Information Officer/G-6 and HQDA G-3/5/7.

Please consider my qualifications and experience:

- Evidence of understanding the entire development process that includes specification, documentation and quality assurance and an awareness of business issues as they impact overall project plans
- Experience in mentoring junior developers and provide guidance on software design as described
- Experience in remaining flexible and creative in a dynamic, evolving and rapidly growing environment is essential
- Experience with designing and managing spatial databases is a bonus
- Demonstrated working knowledge of spatial relationships is a bonus
- Experience in lifting/moving heavy furniture with assistance of a dolly
- Experience in presenting to groups of 25 people or less
- Experience with visualization libraries such as d3 is a bonus

Thank you for considering me to become a member of your team.

Sincerely,

Gray Lockman
