Software Analyst Cover Letter

1705 Hiram OrchardBrennahaven, WI 36015

Dear Tatum Grady,

In response to your job posting for software analyst, I am including this letter and my resume for your review.

Previously, I was responsible for support to and participate in NATO working groups, ACSA conferences, bilateral Army Staff Talks, and Army interoperability events as directed.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Advanced understanding of modern web development
- Experience in performing technical testing such as backend process, data migration and scripts testing
- Good analytical, troubleshooting skills and a team player
- Exposure and experience in executing performance and Stress testing will be preferred
- Deliver the highest-level of customer-oriented service
- Proven leadership skills and work well within a team
- Experience with software packaging and OS Imaging
- Advanced knowledge of LANDesk Management Suite, Sophos Safeguard Enterprise, Microsoft Licensing and Windows technologies

Thank you for your time and consideration.

Sincerely,

Greer Lebsack
