

Software Automation Engineer Cover Letter

84715 Dach ViaductMildredmouth, VT 80165-2068

Dear Emerson Friesen,

Please consider me for the software automation engineer opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for hands-on assistance to identify and resolve issues that arise when integrating the application software with other software components.

Please consider my qualifications and experience:

- Experience in Software development for Machine Vision Systems, PLC's and Motion Control (Neurocheck, Beckhoff and Siemens)
- Experience with Mechatronic Simulation
- Designs and develops custom test automation tools for electronic trading systems on the Windows platform
- Work in an integration test environment and when needed, troubleshoot and fix problem code
- Learn the application in order to be able to do obscure problem replication and problem fixing
- Works with users and other technical support staff, and responds to production questions and problems as needed
- Good Java programming skills, hands on experience w/ TestNG, jUnit
- Software testing methodology (TDD), including writing and execution of test plans, debugging, and testing scripts and tools

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Royal Goyette
