

Software Automation Engineer Cover Letter

7765 Luettgen SummitJastfort, IA 11300-5217

Dear Tatum Kerluke,

I would like to submit my application for the software automation engineer opening. Please accept this letter and the attached resume.

Previously, I was responsible for requirements for agile user stories and act as the voice of the customer during product development.

My experience is an excellent fit for the list of requirements in this job:

- Interest in testing and investigating how things work internally
- Familiarity with quality assurance or software development is an advantage
- Knowledge of Ethernet, RS232, Modbus, CAN, EtherCAT, TCP/IP communication protocols
- Strong, proven C++ and C# skills
- Experience with Continuous Integration (CI) software, such as Jenkins
- Ethernet/Profinet, RS232/422/485, CAN Open, Profibus
- Data base Administration as SQL, Access
- Strong knowledge of automated test methodologies is essential, including automated test script development, automated test tool/utility development, and participation in establishment of an automated testing framework

I really appreciate you taking the time to review my application for the position of software automation engineer.

Sincerely,

Azariah Homenick
