

Software Automation Engineer Cover Letter

909 Shira Square
Lake Sanjuanita, ME 61790

Dear Cameron Huel,

I would like to submit my application for the software automation engineer opening. Please accept this letter and the attached resume.

Previously, I was responsible for technical recommendations, project prioritization, and partnership of application development with engineers, including interacting with third party development organizations.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with regression testing and providing manual testing coverage for web apps
- Proactive person who will communicate with developers and the client and make suggestions
- Software development or testing experience
- Web services or UI test automation experience (using Selenium)
- Hands on experience in unit test framework like NUnit/JUnit/MSTestGood
- Detail oriented, dependable, organized, rigorous, autonomous, team spirit
- Curious and proactive mind-set with a high sense of ownership and commitment
- Flexible to changes and resilient to stress

Thank you for taking your time to review my application.

Sincerely,

Emerson Kiehn
