Software Developer Cover Letter

14296 Roberts KnollsEast James, UT 71369-6812

Dear Avery Bernhard,

I submit this application to express my sincere interest in the software developer position.

In my previous role, I was responsible for support in a variety of areas to include Field Programmable Gate Arrays (FPGAs), Digital Signal Processors (DSP), Windows devices Drivers, Embedded SQL, Video Transcoding, Bandwidth Aggregation, and OCR data processing.

Please consider my qualifications and experience:

- Basic knowledge in algorithmics, data structures and general optimization techniques
- Good hands on development Experience in Java, J2EE
- Knowledge in JBoss, JBPM, JMS, Oracle AQ, Swing, Eclipse, Apache Tomcat
- Should code and unit test in conformance to standards and design specifications
- Should know the complete SDLC (Software Development Life Cycle) process
- Should possess good communication skills and have excellent analytical aptitude
- Experience writing elegant, readable, maintainable HTML and CSS
- A passion for creating engaging and intuitive user experiences

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Campbell Ernser
