

Software Developer Cover Letter

14569 Torri OvalEmilyport, AL 52043

Dear Dakota Hilll,

I submit this application to express my sincere interest in the software developer position.

Previously, I was responsible for technical operational support and investigate faults in production systems to guide business analysts in developing requirements to address them.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Work as part of a team, and be able to work independently
- C# / ASP.NET development
- Proficient knowledge of Microsoft desktop products
- Core Java, J2EE, C, C++
- Unix and java scripting
- Good communication and teaming"
- At least 6 months experience in Database internals
- Experience with standardized project build/management tools and artifact repositories, specifically Maven and Nexus

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Tyler Breitenberg
