

# Software Engineer, Test Cover Letter

8191 Wayne TrailKingview, ID 96285-4967

**Dear Lennox O'Connell,**

I am excited to be applying for the position of software engineer, test. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for guidance to a team of developers with either planning and execution and/or design architecture using agile methodologies such as SCRUM.

My experience is an excellent fit for the list of requirements in this job:

- Experience with functional automated testing, participating in software test requirements, building test plans, and writing scripts to automate tests
- Master's in Computer Engineering or related
- Database experience including proficiency at writing and executing SQL database queries
- Experience with wireless communication and networking systems
- Network latency and throughput measurement experience
- Strong knowledge on test methodologies, test strategy, planning and execution
- Hands on with software tools used for development and test (Android Studio, Xcode, Visual Studio, Eclipse)
- Application-level network protocol testing for functionality, conformance, security

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Shae Mertz
