Software Engineer, Test Cover Letter

4330 Irving CenterRueckerborough, PA 85755-9432

Dear Dylan Schuppe,

In response to your job posting for software engineer, test, I am including this letter and my resume for your review.

Previously, I was responsible for hands-on leadership for a development team, building and enhancing our applications in our service-oriented, highly scalable environment.

My experience is an excellent fit for the list of requirements in this job:

- Familiar with Image Processing and Computer Vision Algorithms
- Experience of image processing and computer vison algorithm development or test
- Experience with C++ development and other object oriented programming languages such as C#
- Shall have experience with test automation tools
- Sets up test environments to allow test cases to be executed in the mainframe and mid-tier environments
- Experience developing in languages such as Java, C++, C, or C#
- SQL and database testing for data warehouses
- General proficiency in Microsoft Office desktop applications, especially Word and Excel

I really appreciate you taking the time to review my application for the position of software engineer, test.

Sincerely,

Denver Jakubowski
