

# Software Engineer, Test Cover Letter

77876 Glover LandEast Izetta, NH 82900-3228

**Dear Emerson Olson,**

I am excited to be applying for the position of software engineer, test. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for guidance to developers with either planning and execution and/or design architecture using agile methodologies.

Please consider my qualifications and experience:

- Familiarity with the Software Development Life Cycle (SDLC) Experience with and knowledge of QA processes
- Creates and maintains applicable Software Project Plans, Software Test Plans, Test Scripts with Test Data, Installation Guides, User's Manuals, Tutorials, Training/Lesson Plans, and On-line Help for each appropriate application
- In addition to software engineering activities, supports the preparation (including briefings, metrics and status reports) and attendance of technical and managerial meetings and reviews any other TDY activities specified by the customer
- A working knowledge of the software, or class of software, being tested, to include experience with the existing software, previous versions, or any associated software used in conjunction with the software being tested
- Working knowledge of embedded software systems, Android, and QNX or Embedded Linux
- Experience in testing of Automotive infotainment systems
- Working knowledge of CAN protocol, CAN analyzer tools
- Working knowledge of test automation, Android test automation, scripting languages

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,
