Software Engineering Internship Cover Letter

8886 Rocio PlainsNew Jenifferhaven, NM 12246-0212

Dear Campbell Zulauf,

In response to your job posting for software engineering internship, I am including this letter and my resume for your review.

In my previous role, I was responsible for first and second level operating systems support for the z/VM & z/LINUX mainframe environments.

Please consider my experience and qualifications for this position:

- Strong functional use of Excel, Word, PowerPoint, and knowledge of Access or SQL
- Experiences in parallel computation
- Comfort in object-oriented language
- Opportunity to become a part of successful international company working on cutting edge transmission electron microscopy in Eindhoven, the heart of the Brainport region
- A great internship allowance and a laptop from our company
- Training, mentorship and development support
- General programming languages C, C++, Java, Hadoop or others
- Knowledge of Statistical Studies or Computer science

Thank you for considering me to become a member of your team.

Sincerely,

Sutton Larkin
