Software Quality Test Engineer Cover Letter

3894 Kenneth SpursSouth Kermitton, IA 85585

Dear Gray King,

In response to your job posting for software quality test engineer, I am including this letter and my resume for your review.

In the previous role, I was responsible for guidance for the development and execution of software test plans using both automated and manual testing to ensure products meet design specifications and are within the specified quality standards.

My experience is an excellent fit for the list of requirements in this job:

- Unwavering focus
- High on technical trouble shooting through logical reasoning
- High on work ethics
- Good working knowledge on software verification (manual, automated, scripting)
- Extensive knowledge of Neoload (Certification Preferred)
- Extensive knowledge of DynaTrace
- Extensive experience with Python
- Familiarity with Bamboo, JIRA, and Confluence

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Rory Welch
