

Software Quality Test Engineer Cover Letter

101 Jody Estate Murazikfurt, CT 61544

Dear Alexis Rutherford,

I would like to submit my application for the software quality test engineer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for technical leadership for continuously improving the speed, cost and quality of the processes involved in the design and build of automated testing of new product pilots and prototypes.

Please consider my qualifications and experience:

- Extensive hands-on software development and architecture skills in C language
- Proficiency in developing and implementing test plans and test scripts
- Familiarity with other software languages (C++, Python, JSON, XML) preferred
- Familiarity in Agile and Waterfall testing methodologies
- Familiarity with various software testing methodologies such as Black Box, White Box, Regression
- Basic knowledge of electronics hardware and electronics instrumentation (oscilloscope, multimeter)
- Proactive in developing answers to questions and offering solutions
- Experience of networking protocol, preferably L2 protocols, MEF-services, SDN and networking knowledge in general is a great merit

Thank you for considering me to become a member of your team.

Sincerely,

Phoenix Harber
