

Software Quality Test Engineer Cover Letter

8677 Armstrong GreensLake Michel, HI 40128

Dear Shiloh Strosin,

In response to your job posting for software quality test engineer, I am including this letter and my resume for your review.

In my previous role, I was responsible for support to engineering and operations on design of MHE automated systems including evaluation and testing criteria.

Please consider my qualifications and experience:

- Familiarity with concepts and practices in software quality assurance
- Knowledge of Agile Methodology is preferred
- Able to work under minimal supervision and apply sound judgment
- Oriented toward team success
- Good verbal and technical writing skills
- Proficient in German and English – verbal and written
- Hands-on experience with systematically testing software
- Working knowledge of eCATT

Thank you for considering me to become a member of your team.

Sincerely,

Armani Pollich
