

# Software Quality Test Engineer Cover Letter

10395 Julio Wall South Jonnaburgh, TN 90675-0418

**Dear Campbell Stracke,**

Please consider me for the software quality test engineer opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for the infrastructure, configuration and best practices that facilitate automated testing, load testing, stress testing, and integration testing such that users have the ability to develop tests to ensure resiliency.

My experience is an excellent fit for the list of requirements in this job:

- Experience in software design verification testing
- Experience with test of embedded, application and/or cloud software
- Experience with medical equipment design, test and manufacturing
- Experience with DOORs Quality Manager or HP Quality Center
- Understanding of Agile/SCRUM development methods
- Understanding of test method validation
- Experience in highly regulated industries, ie
- Curious and analytical

**I really appreciate you taking the time to review my application for the position of software quality test engineer.**

Sincerely,

Robin Schiller
