Software Test Engineer Cover Letter

67019 Schaefer IslandsNew Loveburgh, KY 21942

Dear Riley Klocko,

I am excited to be applying for the position of software test engineer. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for ongoing support for embedded Linux software systems to meet technical and customer requirements.

My experience is an excellent fit for the list of requirements in this job:

- Working knowledge of (Embedded) Linux administration, with focus on network administration, and Linux scripting languages (at least one of {bash, perl, python})
- Understanding of the IEC 61850 standard and related development and monitoring tools, such as those included in the Omicron Test Universe
- Working knowledge of PLC dialects (IEC 61131-3) and related build and deployment tools, such as Copa-Data Straton
- Familiarity with power engineering concepts / electricity transmission and distribution grids
- Familiarity with WAMS concepts and synchrophasor measurements
- Familiar with macOS environment
- Solid understanding of control systems
- Experience working on or testing low level components of operating systems

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Ryan Stehr
