

Staff Network Cover Letter

638 Ernser Walk Emmerichberg, NJ 90988

Dear Skyler Cassin,

In response to your job posting for staff network, I am including this letter and my resume for your review.

Previously, I was responsible for technical assistance and support to a Cisco based MPLS network with 10 core sites and 1000+ remote sites.

My experience is an excellent fit for the list of requirements in this job:

- Work closely with the network QA team to ensure all new network designs and changes are tested and certified in non-production environments prior to production deployment
- Experience with Electronic Engineering/development/support of USCG/USN shipboard Command and Control systems highly desirable
- Have a working knowledge of computer networks' serial interfaces to external devices
- Expert-level knowledge of Unix or Linux system administration at scale
- General Understanding of Budgets and/or Capable of Learning about Budgeting (capital and functional) and accounting processes to ensure compliance with the budget
- Willingness to embrace, influence, and lead change
- Familiarity with network management and diagnostic tools
- Work collaboratively with multi-functional distributed teams Engineering, QA and Product Management in all phases - Requirements, Development, Testing, Launch/Release

Thank you for taking your time to review my application.

Sincerely,

Ryan O'Reilly
