

Statistician Senior Cover Letter

262 O'Kon ValleySangville, WI 42010-0475

Dear Parker Weimann,

In response to your job posting for statistician senior, I am including this letter and my resume for your review.

In my previous role, I was responsible for expertise to design, analysis and reporting of clinical trials or other scientific research studies.

Please consider my experience and qualifications for this position:

- Strong knowledge of Biostatistics, understanding of clinical and data management concepts as applied to drug/vaccine development within the Pharmaceutical industry
- Good working knowledge of statistical software SAS (R is an additional asset)
- Knowledge of statistical techniques including Logistic Regression, Tobit Regression, Decision Tree, Cluster Analysis, Principal Component Analysis, Survival Analysis and Experimental Design
- Experience in digital marketing and web analytics preferred
- MSc in statistics or a related area
- Willingness to travel to other European MSD sites
- Prepares reports, graphs, charts and occasionally provides oral presentations of the results of statistical studies
- Perform statistical analysis of operational field dataKnowledge of data visualization techniques

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Briar Luettgen
