

Strategy Manager Cover Letter

90058 Lawrence Extensions South Dorcas, KS 83537-8136

Dear Dakota Gusikowski,

In response to your job posting for strategy manager, I am including this letter and my resume for your review.

Previously, I was responsible for strategic advisory to North American clients across some of the following segments and thought leadership areas:.

My experience is an excellent fit for the list of requirements in this job:

- Drive alignment on project scope, governance and participation across IST and partners in Upstream and Downstream
- Manage key strategic projects, working with both business units and functions in IST and its partners
- Familiarity with EEM valuation methodology and valuation models and application to deal flow and overall strategic importance to IST
- Identify and articulate long term trends, working with Global Analytics team, trading benches and originators
- Formulate strategic frameworks for IST including helping leadership of the business
- Understand and effectively communicate different choices, directions and interventions open to the business and the possible consequences of these choices
- Provide input and challenge to the businesses and functions with regard to strategy development and implementation plans
- Ensure timely, high quality, project completion and embed implementation plans in operating businesses

Thank you for your time and consideration.

Sincerely,

Hayden Legros
