

System Administration Cover Letter

653 Abigail Shore Marquardtbury, WI 95880

Dear Onyx Bruen,

I would like to submit my application for the system administration opening. Please accept this letter and the attached resume.

Previously, I was responsible for escalation level-3 support for WWE workstations, laptops, printers, network devices, servers, peripherals, and other computer-related devices.

Please consider my qualifications and experience:

- Tests backup software updates and patches
- Monitors and tunes backups to achieve optimum performance levels in standalone and multi-tenant environments
- Recovers data from backup
- Designs, develops, recommends and implements new or revised backup software, utilities and automated processes as necessary
- Provides in-depth diagnosis for backup software/hardware failures and develops solutions
- Design and create disaster recovery procedures and directs recovery operations in the event of destruction of all or part of the operating system or customer data
- Implements appropriate levels of backup security, including encryption and replication
- Strong knowledge of Enterprise Level backup infrastructure, including clients, servers, backup targets and replication

Thank you for your time and consideration.

Sincerely,

Onyx Breitenberg
