System Support Analyst Cover Letter

3855 Schuster ForgePort Mercedez, MI 87242-0426

Dear Marion Goyette,

I am excited to be applying for the position of system support analyst. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for in-depth technical and functional solutions to business leaders and IT management that ensure development and configuration of efficient application systems in accordance with established standards, procedures, and methodologies.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience supporting (.NET, C#) client software on Windows Operating systems
- Experience with Cellular data communications (GPRS/EV-DO/HSPA+/LTE)
- Familiar Computer Security, Client-Server and Cloud computing concepts
- Experienced using modern software engineering tools including Eclipse, Rational Application Developer (RAD), for design, development, and testing the software
- Experience in single page application with AngularJS routing
- Experience in AJAX for JSON data transfer using JavaScript, jQuery, and AngularJS
- Able to setup servlets to handle HTTP requests utilizing the front controller design pattern
- Experience routing HTTP requests using Spring MVC

I really appreciate you taking the time to review my application for the position of system support analyst.

Sincerely,
