

System Support Analyst Cover Letter

75665 Rosina PrairieMagalyville, KS 41586

Dear Riley Medhurst,

I submit this application to express my sincere interest in the system support analyst position.

In my previous role, I was responsible for business Level support for coordination of independent costing and business process endeavors to ensure consistency of approach and methodologies.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- B.Sc Biomedical , B
- Post graduate experience in Flow Cytometry
- Train the trainer or equivalent certification
- Proven experience in the full training cycle needs analysis, curriculum design, training delivery and evaluation
- Proven experience on Beckman Coulter Flow Cytometry
- Demonstrated working knowledge of complex, technical products and systems
- Customer support of software and hardware in a Windows based environment including deciphering complex application logs
- Experience with Serial, Bluetooth, Wireless (802.11) data communications

Thank you for your time and consideration.

Sincerely,

Story Mayert
