Systems Admin Cover Letter

50880 Ebert StravenueEvanton, FL 49555-8803

Dear Campbell Bernhard,

I submit this application to express my sincere interest in the systems admin position.

In my previous role, I was responsible for a&A support to make sure Information Systems meet ICD 503 guidelines and receive their Authority to Operate (ATO).

Please consider my qualifications and experience:

- Networking and Virtualization technologies including Cisco, FTP, Active Directory/ User Authentication, PKI, VOIP, Chat
- General level of understanding regarding common Storage Subsystems connectivity (Fiber Channel, iSCSI, SATA, SAS, SCSI, NFS, HBA), Storage Subsystem disk configuration (RAID levels 0,1,5,6,1+0), and Storage Subsystem provisioning to CLIENT
- Reports all incidents (actual incidents and near misses) in accordance with the CLIENT'S Incident Reporting requirements
- Actively participates in incident investigations and risk assessments as deemed necessary by CLIENT'S management
- Supports continuous improvement in the process and quality of operations
- Gives status updates on a regular basis
- Experience providing direct customer service and direct enterprise-level desktop and/or server support
- Experience with Microsoft-based servers, databases, and workstations (Windows/Linux operating systems, VMware, and Networking Switches, Routers, LANs, & cabling)

Thank you for considering me to become a member of your team.

Sincerely,

Marion Boyer
