

# Systems Administrator Linux Cover Letter

6285 Queen PlazaMarionhaven, KS 76412-2224

**Dear Greer Hansen,**

In response to your job posting for systems administrator linux, I am including this letter and my resume for your review.

Previously, I was responsible for in-depth knowledge and technical expertise in the areas of design, installation, maintenance, and support of network infrastructure following established methodologies and processes.

Please consider my experience and qualifications for this position:

- Provide first level operational support, including creating / updating documentation
- Able to prioritize multiple competing demands
- Able to work a part-time flexible 12-hour shift schedule including overnights
- Hands-on experience with automation/configuration management using Puppet
- Strong Linux admin background, RHEL/CentOS/Fedora preferred
- Experience with Hypervisors (VMware preferred), Tomcat, and Postgres
- Proficient in Linux server management and administration on both Physical and virtualized environments
- Experience in installing, configuring, and maintaining services such as LDAP, Samba, VAS/QAS, Apache, ReaR, PCP

**Thank you for considering me to become a member of your team.**

Sincerely,

Reese Purdy
