

Systems Administrator Linux Cover Letter

134 Connie Curve New Kingmouth, NE 33639-8454

Dear Riley Stroman,

I submit this application to express my sincere interest in the systems administrator linux position.

Previously, I was responsible for technical expertise in the areas of data, data analysis, and database modeling and technologies with a broad enterprise perspective.

My experience is an excellent fit for the list of requirements in this job:

- Experience and knowledge of the skills needed for a customer support role to include a focus on listening, rapport-building, friendly and approachable nature, courtesy and patience, and negotiating and influencing skills in a diverse user community with wide levels of computer literacy
- Broad and in-depth knowledge and technical expertise with enterprise support tools for management, patching, backup or software distribution, Linux operating systems and computer security concepts and practices, and computer network hardware/software protocols and principles
- Experience with writing intermediate to advanced shell scripts
- Knowledge of Openstack Swift internals
- Support for ArcSight 6.5 – 6.9.1 (ESM Manager, Command Center, Management Center)
- Data transport or data brokering experience
- System monitoring experience (Nagios, Zabbix, Splunk)
- Experience with managing systems hosted in VMware or Amazon Web Services (AWS) hosting infrastructures, shell scripting tools or languages for task automation, and integrating Linux with Active Directory

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,
