

Systems Security Specialist Cover Letter

23773 Priscila StreamNorth Jimport, WI 68248

Dear Jordan Beatty,

In response to your job posting for systems security specialist, I am including this letter and my resume for your review.

In my previous role, I was responsible for strategic and technical direction in leading activities in computer security concepts including Identity & Access Management, Application Security, and Risk & Compliance.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Project Management certificate, OPMA, PMP
- Proven success in navigating complex organizations with loosely defined structures and boundaries
- Management experience in risk mitigation and project stewardship
- Experienced verbal and written communicator providing clear and concise narrative and project reports
- Strong experience in conducting Risk Assessments and mitigation in a fully automated manufacturing setup
- Should have experience in working with Global Clients and MNC's
- Should be Open to Work in Different Time zone
- Log correlation and event management systems

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Alexis Goldner
