Tableau Developer Cover Letter

9370 Metz RueWest Sheldon, NH 39615

Dear Indigo Mills,

I submit this application to express my sincere interest in the tableau developer position.

Previously, I was responsible for detailed technical & design documentation of all work developed; the docs should include BI reports, assumptions.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- BS in Business, Computer Science, Management Information Systems, or Information Technology
- Data manipulation, preparation
- Experience with other BI Reporting tools such as SSRS, Business Objects, Cognos
- Tableau desktop and server (including back end) to expert level
- Knowledge of a variety of data sources and structures typically connected to from Tableau (at a minimum, SQL Server, Excel)
- Familiarity with typical enterprise process and controls around release management, testing and deployment
- Alteryx experience (any Alteryx Server experience will be extremely advantageous)
- Any exposure and experience with continuous integration and deployment tools, devops practices

I really appreciate you taking the time to review my application for the position of tableau developer.

Sincerely,

Skyler Miller
