

# Tableau Developer Cover Letter

751 Deanne ShorePort Ludieland, UT 88601

**Dear Riley Leannon,**

I am excited to be applying for the position of tableau developer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for data insights: Identify, prepare, join, and blend various internal and external data sets, and interrogate and analyse the results in order to gain insights currently unavailable to management.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Requires a thorough, detailed and creative individual with strong analytic, conceptual, and problem solving abilities
- Programming experience with Java is highly desirable
- Knowledge of best practices in data visualization and Business Intelligence, including but not limited to cutting-edge software features and capabilities of Tableau version 9.x or 10.x
- Experience with ETL tools or performing ETL processes o Strong aptitude for enhancing and automating queries from data sources such as relational databases and flat files
- Experience working with end users to troubleshoot problems with both Tableau Desktop and Server
- Previous experience supporting a federal agency
- Advanced analytics experience, including natural language processing & machine learning desirable
- Data Warehousing & connecting to various data sources

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,
