

Team Technician Cover Letter

496 Brain PassNorth Renatoview, AL 39808

Dear Campbell Marks,

In response to your job posting for team technician, I am including this letter and my resume for your review.

Previously, I was responsible for oversight of Safety Programs such as the Respiratory Protection Program, Lockout/Tag-out Program, and Confined Space Entry Program.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Work with electrical devices is preferred
- Complete functional experience in current assigned department, with functional experience and training in two up-line or down-line departments
- Possess basic trouble-shooting skills and expertise in resolving issues remotely in person (deskside)
- Good English written/verbal communication and customer engagement skills
- Full computer literacy, including fluency with computers and software such as email, spreadsheets
- Strong focus on providing an outstanding user experience
- Strong Knowledge of cabling infrastructure, fiber cabling, connector types, optical distribution frames, splice trays, patch panels, various vendor's naming conventions
- Experience with inventory database systems such as Netcracker and Granite

Thank you for your time and consideration.

Sincerely,

Royal Kessler
