

Tech Project Manager Cover Letter

95032 Ledner Trail Monikaside, MT 79908-4421

Dear Onyx McCullough,

Please consider me for the tech project manager opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for project management assistance, expertise, and/or resources for the technology aspects of new software and services being deployed.

My experience is an excellent fit for the list of requirements in this job:

- At least one scripting language – Unix Shell scripting, Jenkins, Windows Batch, ViB Script or Groovy scripting
- Demonstrates advanced knowledge of managing projects using an SDLC and creating lifecycle deliverables including detailed project, risk, and issue plans to ensure project goals are accomplished
- Effective verbal and written communication skills to appropriate levels within the sponsoring business areas
- Experience with providing leadership in application development
- Experience with translating functional and non-functional requirements into detailed technical specifications
- Typically involves extensive interactions with product development, sales, client relationship teams, technology solutions, service delivery and/or other cross-functional teams
- Strong expertise in tech
- Excellent creative technology communicator able to bring to life new creative ideas by finding and deploying unique solutions

I really appreciate you taking the time to review my application for the position of tech project manager.

Sincerely,
