

Technical Analyst Cover Letter

74782 Dina Islands South Ashliview, LA 51171

Dear Ari Fisher,

Please consider me for the technical analyst opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for security Infrastructure support by performing the following: Hardware and software installations, start/restart/stop instances; rotate and analyze server logs; availability metrics reporting; maintain server configuration; upgrade and maintain Security Infrastructure software, etc.

Please consider my experience and qualifications for this position:

- Deliver and execute high quality work plan tasks on time and on budget, and of high quality
- Escalate and resolve issues and problems to the organization(s) in logical and quantitative terms that facilitate objective decisions
- Enhance personal skillsets, tools, technologies, business knowledge, certifications
- Knowledge of programming languages (e.g., Java, Javascript, C++, C#, HTML, SML, SQL)
- Working knowledge of fundamental web technologies such as HTML & CSS
- High level of knowledge and abilities in testing processes and techniques
- Experience leading small work teams
- Configuring and troubleshooting hardware Device and Drivers.(HP,Dell, Lenovo)

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Sawyer Morar
