Technical Analyst Cover Letter

983 Howell LoopRigobertomouth, MI 86254-2838

Dear Avery Durgan,

I submit this application to express my sincere interest in the technical analyst position.

Previously, I was responsible for security Infrastructure support by performing the following: Hardware and software installations, start/restart/stop instances; monitoring replication; rotate and analyze server logs; availability metrics reporting; maintain server configuration; upgrade and maintain Security Infrastructure software, etc.

My experience is an excellent fit for the list of requirements in this job:

- Knowledge of federal, state laws including the Family Educational Rights and Privacy Act of 1974 (FERPA) and applicable university policies
- Experience with any programming language, such as SQL, Java or C#
- Functional and technical knowledge to facilitate end to end SDLC processes on HHS enterprise-wide solution
- Aptitude to elicit and analyze requirements
- Perform detailed business analysis for various requirements to create a holistic design
- New Starter and Leavers
- Find my shift Administration
- Wallboard administration

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Rowan Green
