

Technical Artist Cover Letter

681 McDermott CornersNew Augustinafort, NC 57695

Dear Onyx Simonis,

I am excited to be applying for the position of technical artist. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for solutions that take into account network latency, de-synchronization of data between networked machines/players, packet compression, cheating and interrupted connections.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Knowledge of modeling and texturing techniques
- Extensive knowledge of 2D art packages (Photoshop)
- Being able to customize art packages so they are as efficient as possible for production (scripting)
- Being able to think creatively to resolve technical challenges and limitations
- Scripting (Python, Lua, Maxscript, Jscript)
- Able to author and support tools in a production environment
- A strong understanding of character rigging and rigging pipelines
- Production knowledge of Maya, 3D Studio Max and Adobe After Effects

Thank you for taking your time to review my application.

Sincerely,

Phoenix Fay
