

Technical Artist Cover Letter

83667 Von TunnelNew Torritown, MS 66339

Dear Lennox DuBuque,

Please consider me for the technical artist opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for high level technical and training support for the integration of production, measurement, automation, compression and facilities control data into SCADA data that is critical to asset team decision making, reporting needs and regulatory requirements.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with particle systems, rigid body dynamics, and procedural systems
- Working knowledge of game engines and game editors
- Online demo reel and breakdown
- Comprehensive knowledge of rigging in 3D content creation software, such as 3ds Max or Maya
- Highly self-motivated and collaborative, able to help drive a character from start to finish
- Expert-level knowledge of MaxScript, Python, or C++
- Keen eye for good model topology
- Experience with technical simulation, such as physics or cloth

Thank you for taking your time to review my application.

Sincerely,

Corey Harvey
