Chester, AL 10241

Dear Sutton Conroy,

Please consider me for the technical implementation manager opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for technology leadership in a tightly integrated fintech eco-systems, which incorporates integrations from mainframe to unix and windows web / application servers, and Database Servers.

Please consider my experience and qualifications for this position:

- Critical thinker and self motivated team player
- General knowledge of client's ERP systems
- Experience with online advertising technology highly preferred
- Exhibited competency managing projects in JIRA (or other software-based Project Management suites)
- Many customers choose to develop their own point of sale equipment for card acceptance rather than use our terminals
- Defining project timelines, milestones and thereby ensuring compliance and speed to market, directly influencing GPA income, reputation and customer activation
- Whilst the role is UK based and initially the majority of work is UK focused, this role has an expanding European requirement to manage, own and deliver implementations within the European arena
- VR enthusiast and passionate about content and technology

Thank you for considering me to become a member of your team.

Sincerely,

Charlie Bahringer
