

Technical Research Assistant Cover Letter

829 Elida Isle South Assunta, PA 78263

Dear Rory McLaughlin,

I submit this application to express my sincere interest in the technical research assistant position.

Previously, I was responsible for leadership for the chemical, biological and laboratory safety programs within the Research Institute.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Comfortable and competent handling rodents for behavioral studies
- A comfort with animal handling and research
- Hands-on experience with HPLCs
- Familiarity with additional analytical techniques such as CE, iCIEF, and LC-MS is highly desirable
- Knowledge of GMP compliance, HPLC software, computer programming, and intermediate experience with EXCEL would be useful
- Sound independent judgment and competence in research methodologies and application of the scientific method
- Knowledge of molecular biology and biochemistry
- Organize data for presentation, good oral and written communication skills

Thank you for your time and consideration.

Sincerely,

Ryan Paucek
