

Temporary Technician Cover Letter

270 Bradtke Meadow New Carola, GA 68114

Dear Emerson Robel,

I submit this application to express my sincere interest in the temporary technician position.

Previously, I was responsible for expertise in the operation and troubleshooting of hardware/software used in the laboratory cooperating with other departments, as required, to resolve problems that arise.

Please consider my experience and qualifications for this position:

- Knowledge of Geometry and Trigonometry preferred
- Basic working knowledge of chemistry and statistics
- Have demonstrated proficiency in Excel, including calculations and plots
- Be able to see and assess color and complete the Munsell color test with a passing score
- Typical physical demands include manual dexterity sufficient to perform computer functions of the job
- Experience with cell culture or animal models
- Attention to detail and communication skills
- Knowledge and abilities in managing analytical instruments

Thank you for considering me to become a member of your team.

Sincerely,

Denver Huels
