

# Test Consultant Cover Letter

137 Luisa UnderpassBlickport, CO 61934

**Dear Campbell Cremin,**

I am excited to be applying for the position of test consultant. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for testing expertise across a wide range of type of Testing, such as Non-Functional, End to End and Automation.

My experience is an excellent fit for the list of requirements in this job:

- Experience with planning and conducting E-4B maintenance activities
- Knowledge of E-4B NAOC maintenance processes, plans, depot structure, and command relationships
- Has a good functional knowledge and understanding of the Master data flow for Material and Customer
- Has experience with the integration of MDM, ECC and multiple legacy systems
- Experience working with application developers and infrastructure owners to validate, assess, understand root cause and mitigate vulnerabilities
- Experience identifying, documenting and improving delivering issues identified during security assessments
- Experience with recommending counter-measures and remediation techniques and communicating this to development teams and infrastructure owners
- Expert level understanding of infrastructure penetration testing or expert level understanding OWASP and other software security best practices

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Hayden Anderson
