

# Test Consultant Cover Letter

8900 Heike Terrace South Delilahville, NH 15589-1151

**Dear Alexis Altenwerth,**

In response to your job posting for test consultant, I am including this letter and my resume for your review.

Previously, I was responsible for strong technical leadership to the team including Test tools, Standardization, Test Data, Testing environments, Test reporting, CI/CD pipeline integration.

Please consider my experience and qualifications for this position:

- Good level of understanding of Mobile Application Security concepts
- Significant experience with managing penetration testing against a wide variety of application layer platforms, including web, mobile, and thick client above and beyond running automated tools
- Understanding of the deployment of infrastructure assessment tools (commercial and open source scanners)
- Significant experience with delivery of penetration tests both individually part of a team would be a bonus
- At least one prior full lifecycle implementation
- Experience on the NetSuite OneWorld (multi-currency) is highly desirable
- Assist in further developing our offerings in data management
- Develop best practice and methodologies

**Thank you for considering me to become a member of your team.**

Sincerely,

Finley Deckow
